

Disaster Supply Checklist

Disaster supply kits come in many forms and sizes—from individual, to family, pets, travel, car and/or work kits. Every kit needs a few basic items, many of which you already have around the house. Just gather them together, put them in a bag, and call them your kit! If you are missing a few items, make a trip to a local second-hand or dollar type store to fill in what's missing. You will be surprised how inexpensive it is to get prepared!

IMPORTANT: We'd like to encourage those who have the ability and the resources to be prepared for at least two weeks. That way, the community can focus on those who are not able to take care of themselves, such as children, elderly, and the disabled.

BASIC

BACKPACK

- Water--one gallon per person, per day
